

Department of Urology, Jessenius School of Medicine, Comenius University, University Hospital in Martin, Slovakia

Department of Urology concentrates its activities on urological oncology, particularly in the diagnosis and surgical treatment of prostate cancer, renal cancer, adrenal tumors, and bladder tumors. The other field of expertise prioritizes programs for diagnosis and treatment of functional disorders of the lower urinary tract. The Department of Urology is the only center in Slovakia, which performs neurostimulation of the urinary bladder. It also focuses on the comprehensive treatment of urolithiasis and pediatric urology. In the research program the department is oriented in urological oncology and functional disorders of the urinary tract. The department has 36 beds, three operating theaters (currently before reconstruction), 8 board certified urologists, 4 urological residents, it is fully equipped with specialized equipment. It provides pregradual and postgradual education in urology.
