

The short (2 weeks) clinical visits in the Slovak republic for young urologists from Czech republic , Poland and Hungary

Department of Urology, F.D.ROOSEVELT Teaching Hospital Banská Bystrica, Slovakia

Roosevelt Hospital is one of the largest among hospitals in Slovakia. Urology clinic has 45 beds. We focus on general urology, laparoscopy, robotic surgery and endourology

In laparoscopic urology we perform all sorts of procedures on the kidneys and adrenal glands.

In field of robotic urology we concentrate on robot assisted radical prostatectomy, robotic cystectomy /male and female /, robotic radical and partial nephrectomy and reconstructive operations for hydronephrosis.

Under the program, living donor kidney transplantation, we perform laparoscopic alternatively robotic donor nephrectomy.

In the complex treatment of urolithiasis we have been focused mainly on the latest trends and endoscopic approaches, such as retrograde intrarenal surgery / RIRs /, endoscopic combined intrarenal surgery / ECIRS /, extracorporeal shock wave lithotripsy and percutaneous removal of kidney stones.

In laparoscopy, robotic urology and endourology we annually organise courses for residents and young urologists from Slovakia and the Czech Republic. Courses are made under the supervision of the Slovak Association of Urology. Outpatient department is concentrated on general urology and oncurology.

Chair: Vladimír Baláž, MD, PhD
